

A NON-HAZARDOUS, WATER BASED,  
BIO REMEDIATION CHEMICAL FOR  
HYDROCARBON ELIMINATION

## LS-1000 ACL Biodegradable Solvent

Environmentally safe replacement for chlorinated hydrocarbon solvents.  
Solvent for dissolving hardened petroleum products.  
Sludge generated in washing leaves a favorable environment for microorganisms to bio treat effluent.

LS-1000 ACL is an all natural, non-toxic, low cost alternative to petroleum solvents. LS-1000 ACL  
is made from organic materials and is a superior solvent to Varsol®.

### Benefits:

- Made from distillates from organic materials and is superior to Varsol®.
- Completely biodegradable: Waste water generated in the cleaning process can be discharged in sewer systems where bacteria can convert waste to inert by-products.
- Liquefies burner fuel tank bottoms, asphaltic crudes, and highly degraded petroleum products into removable and/or sellable product.

### APPLICATIONS:

Hardened, highly degraded petroleum products
Wood penetrate
Carrier oil
Burner fuel tank bottoms
Asphaltic crudes

**Directions for use:** Application  
is 6% by volume. Apply with a  
spray apparatus.
